

What It Is

An example of a more difficult conversion process, namely from Microsoft Access to JavaScript!

This application allows the user to create:

- Mailshots (and print address labels and CV/letter for each envelope)
- Recording of job applications in great detail
- Reports about job applications
- Create a custom CV and print it!

Technical Issues

One of the greatest hurdles was the conversion of the actual Access database tables.

What system to use?

Needed to be portable i.e. not require the user to create a database server like SQL Server, did initially try Supabase but the implementation instructions left a lot to be desired..plus if the data base was not used at least once every few days they would put it offline!

So decided to use IndexedDB instead.

IndexedDB Challenges

The biggest issues was the daft way they made *every* database action asynchronous. Truly the design of imbeciles! In a “normal” database system the developer wants the program to open the database *wait* till see if connection is successful *then* continue processing. However in IndexedDB this operation is run in parallel to the application a bit like telling the database you would like a connection then telling it to ring you when its done, really dumb.

In an application database based *nothing* should be available to the user unless the connection is made, caused many headaches initially before a suitable adaptation was devised.

CV creator had to be re-engineered, in fact I had to avoid saving the users creation because of IndexedDB, as the application would need to work with 10+ tables and as IndexedDB also commits each transaction *automatically* this would means nesting 10+ transaction, from a developer perspective this makes it untenable, both from debugging and what happens if one of the 10+ transactions fails?

Auto committing transactions can lead fractured data tables!

So for the moment just creates the CV page, however if I can muster the time to learn PHP that might produce a better solution **but** that would mean the user has to create a SQL Server instance hardly the quick portable solution the Microsoft Access version provides..

Using:

This test version works via Visual Studio Code using Live-Server so make sure you have the correct design environment.

This is not a commercial product merely an example of my ability to convert from one environment to another.

Order Of Precedence

The System has a number of data dependencies that need to be fulfilled in order to use specific parts of the system.

Jobs Applied For Screen

This screen requires the following information to be entered elsewhere *before* using:

- Contract types
- Hours types
- Job status
- Work from

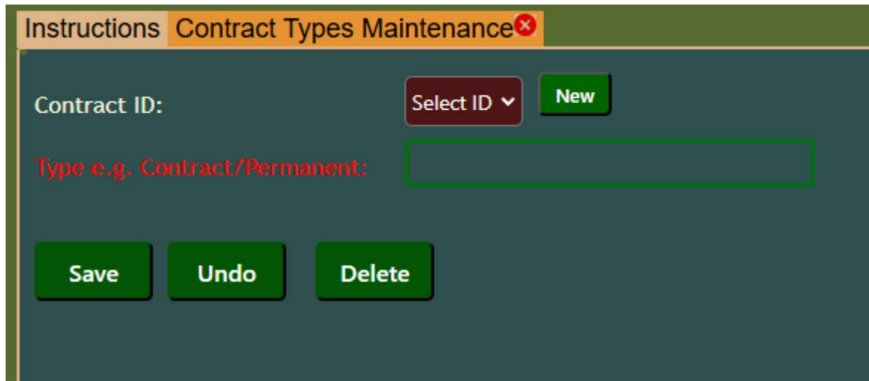

CV Creator

This screen requires the following information to be entered elsewhere *before* using:

- Contact details
- Personal details
- Current focus
- Education
- Experience
- Work highlights
- Interests
- Personality
- Roles
- Skills
- Other information

The Screens Used By: Job Applied For

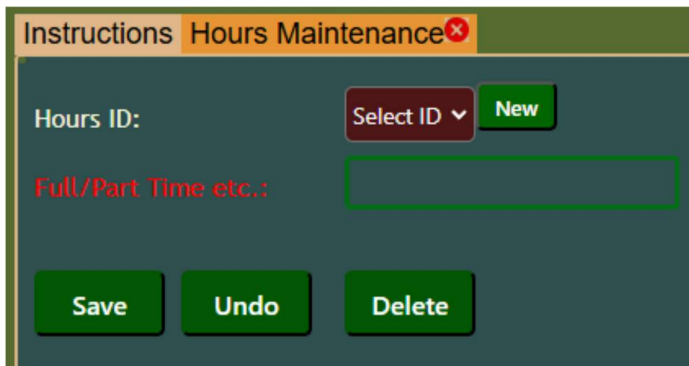

Contract Types Maintenance:

The screenshot shows a web application interface for 'Contract Types Maintenance'. At the top, there is a header bar with 'Instructions' and 'Contract Types Maintenance' (with a close icon). Below the header, the main area has a dark green background. It contains a 'Contract ID:' label, a 'Select ID' dropdown menu, and a 'New' button. Below these, there is a red text prompt 'Type e.g. Contract/Permanent:' followed by a text input field. At the bottom, there are three buttons: 'Save', 'Undo', and 'Delete'.

Use this screen to enter type of contract you are willing to apply for e.g. Interim.

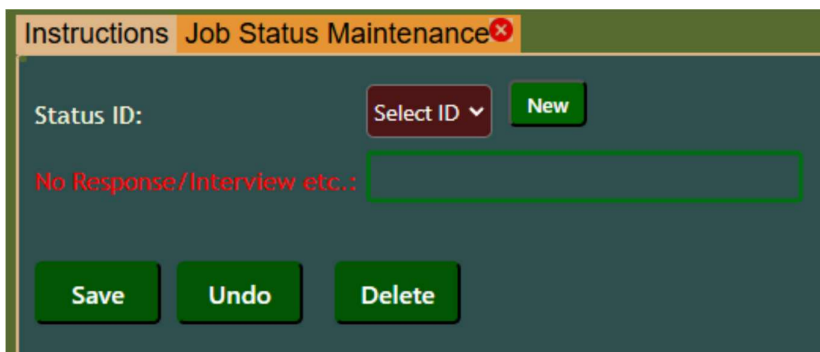

Hours Maintenance:

The screenshot shows a web application interface for 'Hours Maintenance'. At the top, there is a header bar with 'Instructions' and 'Hours Maintenance' (with a close icon). Below the header, the main area has a dark green background. It contains a 'Hours ID:' label, a 'Select ID' dropdown menu, and a 'New' button. Below these, there is a red text prompt 'Full/Part Time etc.:' followed by a text input field. At the bottom, there are three buttons: 'Save', 'Undo', and 'Delete'.

Use this screen to enter the type of hours you are interested in e.g. working full time.

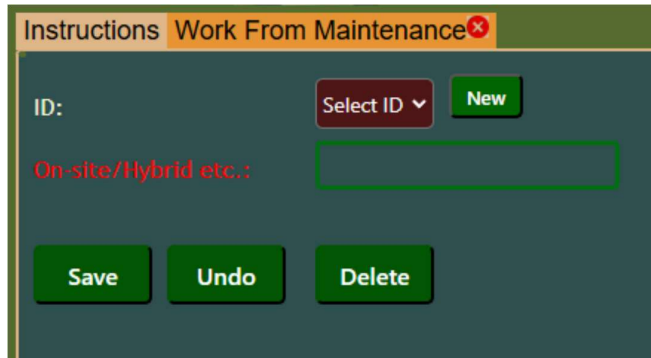

Job Status Maintenance:

The screenshot shows a web application interface for 'Job Status Maintenance'. At the top, there is a header bar with 'Instructions' and 'Job Status Maintenance' (with a close icon). Below the header, the main area has a dark green background. It contains a 'Status ID:' label, a 'Select ID' dropdown menu, and a 'New' button. Below these, there is a red text prompt 'No Response/Interview etc.:' followed by a text input field. At the bottom, there are three buttons: 'Save', 'Undo', and 'Delete'.

Use this screen to enter the various status a job application can be in e.g. interview/applied for etc.

Work From Maintenance:

Instructions Work From Maintenance

ID: Select ID New

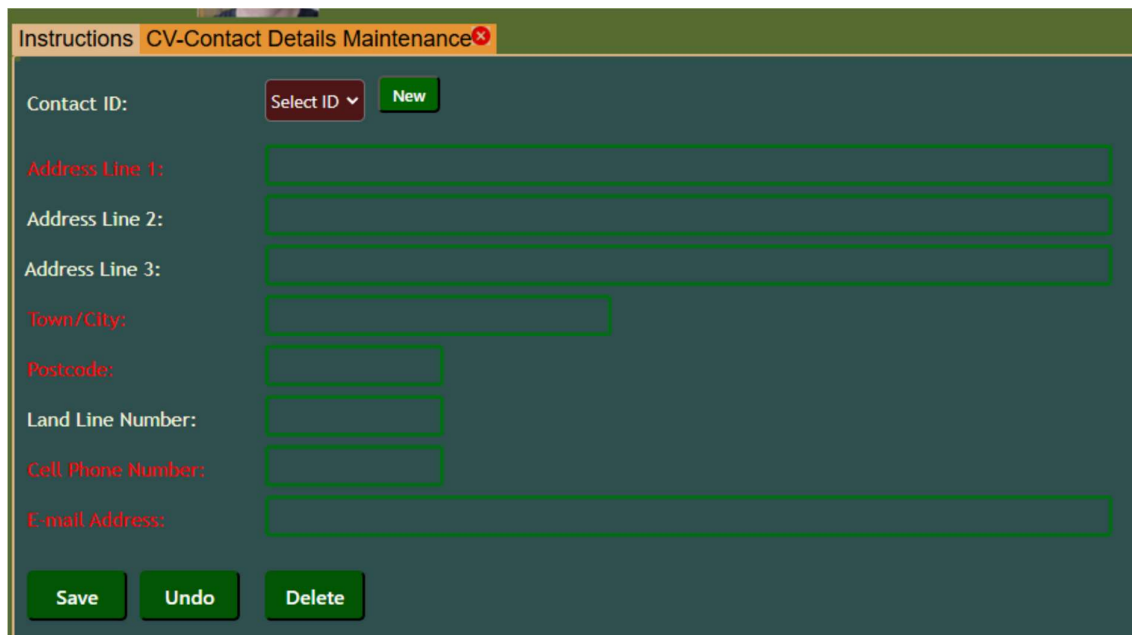

On-site/Hybrid etc.:

Save Undo Delete

Use this screen to enter the various place you could work from e.g. Home/On site etc.

The Screens Used By: CV Template Maintenance

CV – Contact Details Maintenance:

Instructions CV-Contact Details Maintenance

Contact ID: Select ID New

Address Line 1:

Address Line 2:

Address Line 3:

Town/City:

Postcode:

Land Line Number:

Cell Phone Number:

E-mail Address:

Save Undo Delete

Use this screen to enter your contact details.

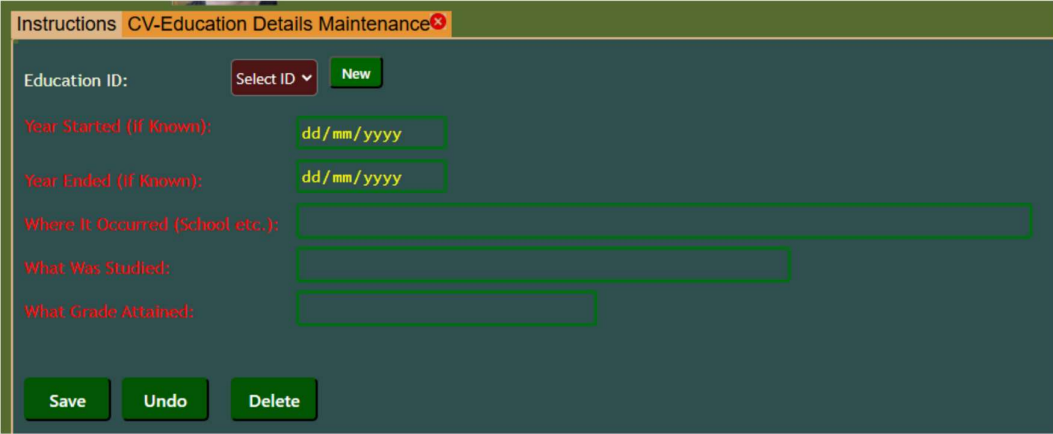

CV – Current Focus Maintenance:

The screenshot shows a web form titled "CV-Current Focus Maintenance" with a close button. It features an "ID:" field with a "Select ID" dropdown and a "New" button. Below this is a "Current Focus:" label followed by a large text input area with the placeholder "Enter current focus". At the bottom are "Save", "Undo", and "Delete" buttons.

Use this screen to enter what you are currently doing that might interest an employer.

CV – Education Details Maintenance:

The screenshot shows a web form titled "CV-Education Details Maintenance" with a close button. It includes an "Education ID:" field with a "Select ID" dropdown and a "New" button. Below are several input fields: "Year Started (If Known):" and "Year Ended (If Known):" both with "dd/mm/yyyy" placeholders; "Where It Occurred (School etc.):" with a long text input; "What Was Studied:" with a text input; and "What Grade Attained:" with a text input. At the bottom are "Save", "Undo", and "Delete" buttons.

Use this screen to enter your education information, if you cannot find *exact* start/end dates but know the year just enter 01/01/<year> e.g. if 1994: 01/01/1994 – start 31/12/1994 – end.

CV – Experience Maintenance:

Use this screen to enter your work experience details as before (as shown in this example) if *exact* start/end dates are not known use 01/01/<year> till 31/12/<year>.

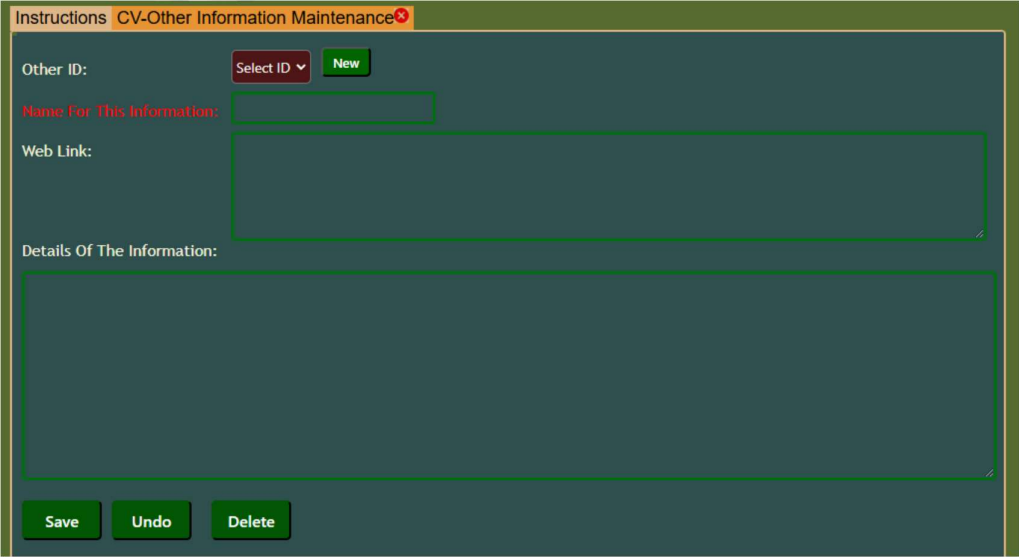

CV – Highlights Maintenance:

Use this screen to enter your highlights from previous/current employers, what interesting or important achievements did you do?

CV – Interests Maintenance:

Use this screen to enter your hobbies and interests outside of work.

CV – Other Information Maintenance:

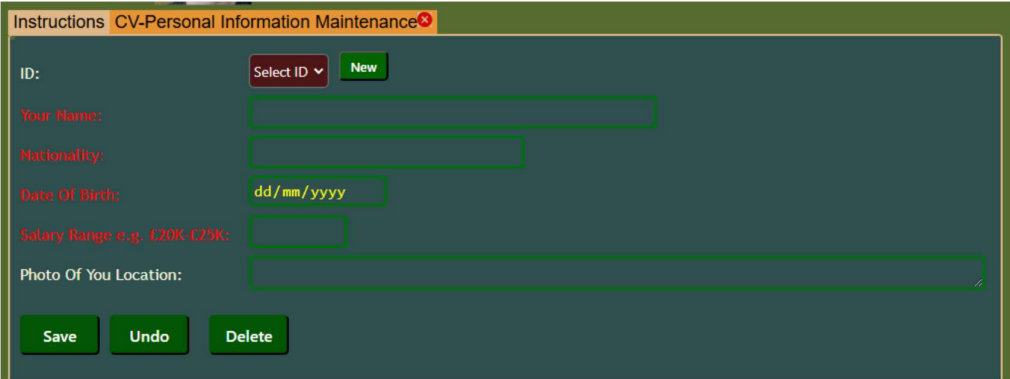

The screenshot shows a web form titled "Instructions CV-Other Information Maintenance" with a red close button. The form has a dark blue background with green borders for input fields. It includes the following fields and controls:

- Other ID:** A dropdown menu labeled "Select ID" and a green "New" button.
- Name For This Information:** A single-line text input field.
- Web Link:** A multi-line text input field.
- Details Of The Information:** A large multi-line text input field.
- Buttons:** "Save", "Undo", and "Delete" buttons at the bottom.

Use this screen to enter anything else about you that could be of interest e.g. external website.

CV – Personal Information Maintenance:

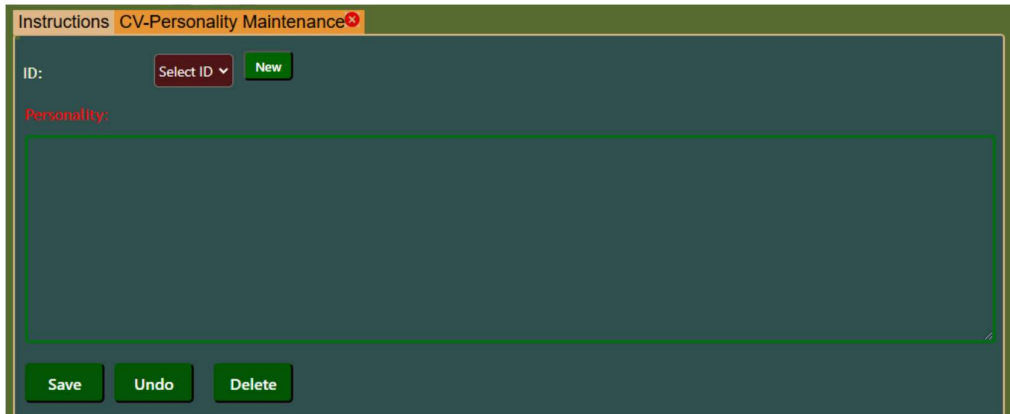

The screenshot shows a web form titled "Instructions CV-Personal Information Maintenance" with a red close button. The form has a dark blue background with green borders for input fields. It includes the following fields and controls:

- ID:** A dropdown menu labeled "Select ID" and a green "New" button.
- Your Name:** A single-line text input field.
- Nationality:** A single-line text input field.
- Date Of Birth:** A single-line text input field with a date mask "dd/mm/yyyy".
- Salary Range e.g. £20K-£25K:** A single-line text input field.
- Photo Of You Location:** A multi-line text input field.
- Buttons:** "Save", "Undo", and "Delete" buttons at the bottom.

Use this screen to enter personal information here.

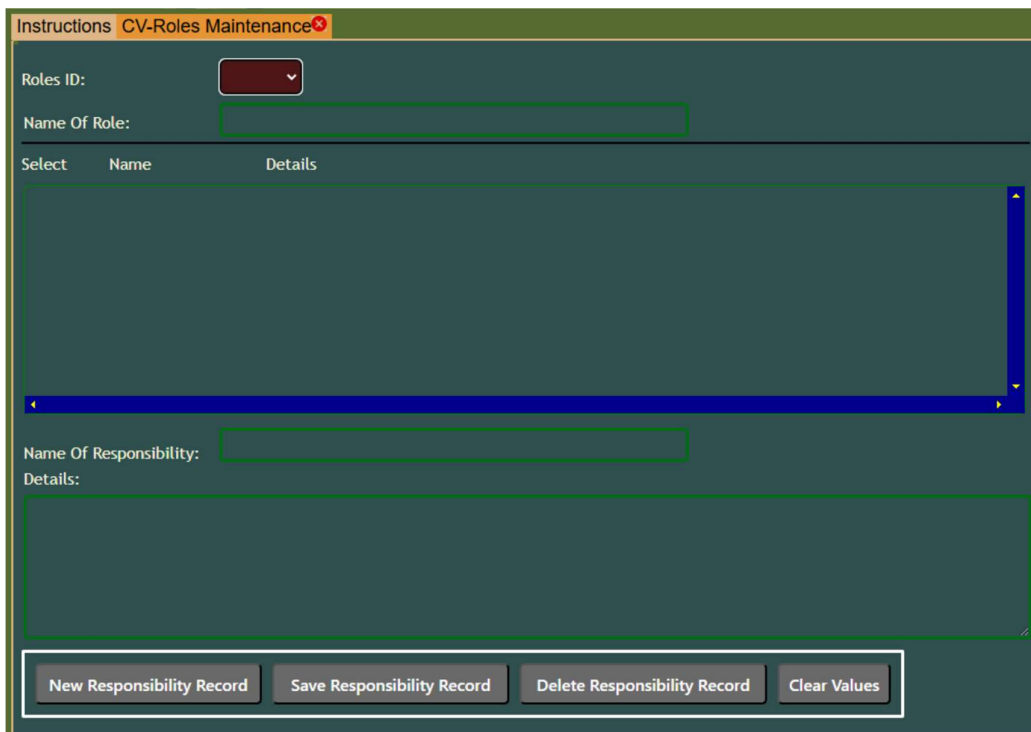

CV – Personality Maintenance:

The screenshot shows a web application window titled "Instructions CV-Personality Maintenance" with a red close button. The form has a dark blue background. At the top, there is an "ID:" label followed by a "Select ID" dropdown menu and a "New" button. Below this is a "Personality:" label and a large, empty text area for input. At the bottom of the form, there are three buttons: "Save", "Undo", and "Delete".

Use this screen to enter information about the type of person you are e.g: hard working/reliable etc.

CV – Roles Maintenance:

The screenshot shows a web application window titled "Instructions CV-Roles Maintenance" with a red close button. The form has a dark blue background. At the top, there is a "Roles ID:" label followed by a dropdown menu. Below this is a "Name Of Role:" label and a text input field. Underneath is a table with two columns: "Select" and "Details". The table is currently empty. Below the table is a "Name Of Responsibility:" label and a text input field. Below that is a "Details:" label and a large, empty text area for input. At the bottom of the form, there are four buttons: "New Responsibility Record", "Save Responsibility Record", "Delete Responsibility Record", and "Clear Values".

Use this screen to enter details of roles and responsibilities you have held during your career.

CV – Skills Maintenance:

The screenshot shows a web form titled "CV-Skills Maintenance" with a tab labeled "Instructions". The form has a dark blue background with green borders around the input fields. It includes a "Skill ID:" field with a "Select ID" dropdown and a "New" button. Below it is a "Skill Name:" text input field. A large "Details:" text area follows. At the bottom, there are "Save", "Undo", and "Delete" buttons.

Use this screen to enter to your skills gained from employment or external sources.

Jobs Applied For:

The screenshot shows a web form titled "Jobs Applied For" with a tab labeled "Instructions". The form has a dark blue background with green borders around the input fields. It includes a "Job ID:" field with a "Select ID" dropdown and a "New" button. Below it are "Date Applied:" (09/03/2025) and "Date Job Expires (If Known):" (dd/mm/yyyy) text input fields. The "Company:" field has a text input and a "Select Company" dropdown. The "Town/City:" field has a text input and a "Select Town/City" dropdown. The "Salary Per Year e.g. £10K:" field has a text input, a "Select Salary" dropdown, and a "What Job Sector?:" field with a "Select Sector" dropdown. The "Job Title:" field has a text input. The "Contract/Permanent etc.:" field has a text input and a "Select Contract Type" dropdown. The "Full Time/Part Time:" field has a text input, a "Select Hours" dropdown, and an "On-Site/Hybrid etc.:" field with a "Select Where" dropdown. A large "Details About Position - Either Type It In Or Copy/Paste From Website Job Advertised:" text area follows. At the bottom, there are "Phone Number (If Known):" and "Contact Name (If Known):" text input fields, a "Status: Applied, Response etc.:" field with a "Select Status" dropdown, and a checkbox for "Advertised By Company". "Save", "Undo", and "Delete" buttons are at the bottom.

Use this screen to enter to details about job applied for.

Mailshots Creator:

This screen creates mailshots, these can be saved and reused!

You can copy-and-paste file locations for CV and covering letter to be printed with the envelopes.

If unsure about your printer settings you can print a single test envelope to assist you.

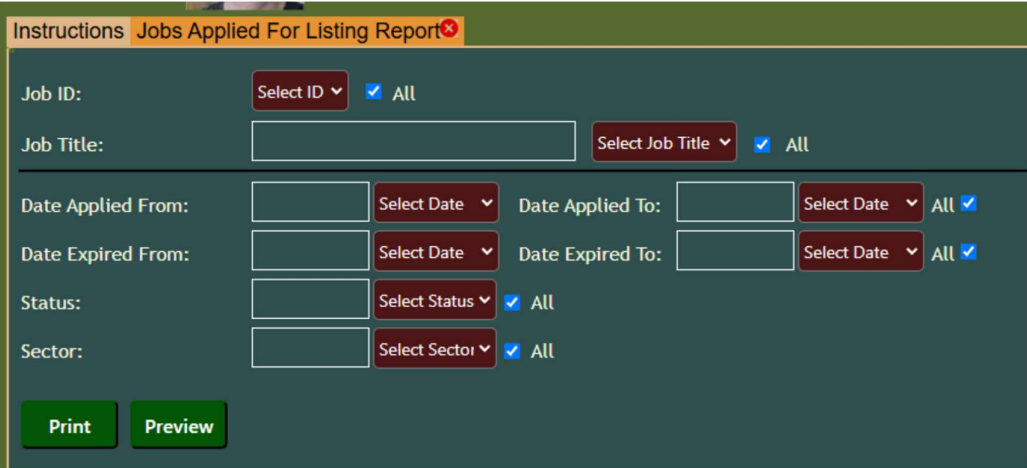

CV – Template Maintenance:

Use this screen to create custom CVs.

Select from the already entered data on the left to put it into the new CV data on the right. Press “Create CV” at the bottom of the page to see the results!

The Reports:

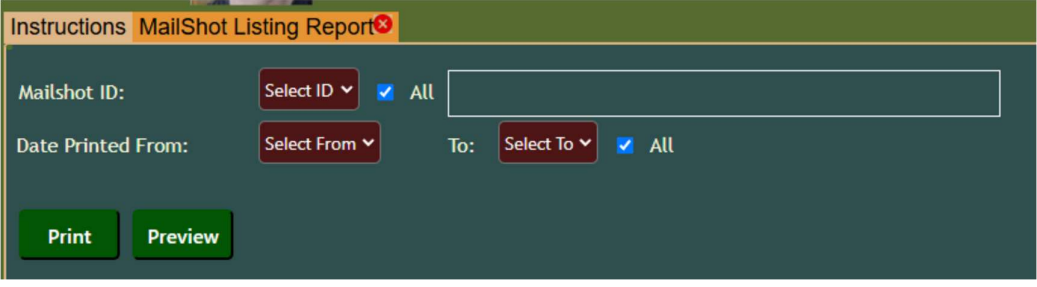

Jobs Applied For Listing:

The screenshot shows a web application interface for generating a report. At the top, there is a header bar with a green background and a dark green border. On the left, it says 'Instructions' in white text. On the right, it says 'Jobs Applied For Listing Report' in white text, followed by a red close button icon. Below the header, the form is set against a dark teal background. It contains several input fields and dropdown menus. The first row has 'Job ID:' followed by a 'Select ID' dropdown and a blue checkmark next to the word 'All'. The second row has 'Job Title:' followed by a text input field, a 'Select Job Title' dropdown, and a blue checkmark next to the word 'All'. The third row has 'Date Applied From:' followed by a text input field, a 'Select Date' dropdown, 'Date Applied To:' followed by a text input field, a 'Select Date' dropdown, and a blue checkmark next to the word 'All'. The fourth row has 'Date Expired From:' followed by a text input field, a 'Select Date' dropdown, 'Date Expired To:' followed by a text input field, a 'Select Date' dropdown, and a blue checkmark next to the word 'All'. The fifth row has 'Status:' followed by a text input field, a 'Select Status' dropdown, and a blue checkmark next to the word 'All'. The sixth row has 'Sector:' followed by a text input field, a 'Select Sector' dropdown, and a blue checkmark next to the word 'All'. At the bottom left, there are two green buttons: 'Print' and 'Preview'.

Use this screen to show a report about your job hunting enquiries.

Mailshot Listing Report:

The screenshot shows a web application interface for generating a 'MailShot Listing Report'. At the top, there is a green header bar with two tabs: 'Instructions' and 'MailShot Listing Report' (which is active and has a red close button). Below the header, the interface is divided into two main sections. The top section contains filters for 'Mailshot ID' and 'Date Printed From'. The 'Mailshot ID' section has a dropdown menu labeled 'Select ID', a checked checkbox next to 'All', and a text input field. The 'Date Printed From' section has a dropdown menu labeled 'Select From', a 'To:' label, another dropdown menu labeled 'Select To', and a checked checkbox next to 'All'. The bottom section contains two green buttons: 'Print' and 'Preview'.

Use this screen to show a report detailing you saved mailshots.

Notes:

While this application does work it still has some issues to fix. Such as finding some way to save the CV templates created by the user.

Also the mailshot printing of CV/Cover letter still needs to be proven outside of the testing area where browser security would not allow it!
